

Ragil Gigih Utomo

Fullstack and AI Engineer

Sleman, Yogyakarta, Indonesia • dionisiusragil48@gmail.com

[Portfolio](#) • [Linkedin](#) • [Github](#)

PROFESSIONAL SUMMARY

Informatics fresh graduate with a strong foundation in programming, machine learning, and web development. Experienced in building scalable applications and developing AI-based solutions through academic and personal projects. Passionate about applying technical expertise to real-world challenges and continuously improving through hands-on experience in the tech industry.

TECHNICAL SKILLS

Programming Language: Python, Javascript, Typescript, C#, PHP

Backend & Data: Flask, Express.js, Node.js, Laravel, MongoDB, MySQL, PostgreSQL

Frontend: Next.js, React, GSAP, Three.js, vue.js, zustand, axios

AI/ML & research: Tensorflow, Keras, Pandas, NumPy

Other Tools: Github, Supabase, Firebase, Prisma, figma

Languages: Indonesian (Native), English (Professional).

EXPERIENCE & PROJECTS

TICKTRACK - Ticketing System

PHP, Javascript, Laravel, vue.js, mySQL

Full-stack IT support ticketing system with role-based issue tracking

2026

- Developed a full-stack IT ticketing system using Laravel 13 (Sanctum auth) and Vue 3 (Pinia/Vue Router).
- Implemented role-based workflows (Admin/User) supporting ticket creation, status updates, and interactive discussion threads.
- Engineered an admin dashboard with real-time statistics and data visualization using Chart.js, following a scalable MVC architecture.

Itinera.ai - AI Powered Travel Planner

Typescript, Next.js, Gemini API, Supabase, Prisma

Automated travel plan for users that can be downloaded as pdf

2026

- Developed an AI-powered travel planning application using Next.js, and Gemini AI APIs to generate personalized itineraries based on user preferences, budget, and travel duration.
- Designed and implemented RESTful APIs for itinerary management, travel data processing, and user preference handling, with secure authentication using JWT.
- Built responsive user interfaces with Tailwind CSS and leveraged Supabase Database with Prisma ORM for efficient data persistence and retrieval across the application.

Chat App - Real-time Chatting Web App

Javascript, Node.js, Express.js, React, MongoDB, Rest API

Real time chat app with key fundamental of website development

2025

- Built real-time 1-on-1 chat with Socket.io, using Zustand for state management and optimistic updates.
- Secured API routes with httpOnly JWT cookies and integrated Arcjet for bot detection and rate limiting.
- Developed a profile/chat image-upload system utilizing base64 encoding and Cloudinary storage.
- Designed a responsive interface with React 19, Tailwind CSS, dynamic skeleton loaders, and audio feedback.

Bangkit Academy - Study Independent

Study independent led by google, GoTo, and Traveloka included machine learning path

2024

- Completed an intensive AI/ML program focused on Python, TensorFlow, Data Analysis, Machine Learning, and Google Cloud Platform (GCP) through hands-on labs and technical assessments.
- Developed machine learning solutions involving data preprocessing, model training, evaluation, and deployment following industry-standard workflows.
- Collaborated in a multidisciplinary capstone project using Agile methodologies, contributing to the design and integration of a production-ready machine learning model.

BioFace - Skin Face Problem Scanner

Python, Tensorflow, Keras, Pandas, flask

Mobile Application to help people solve their face problem

2024

- Collaborated with a cross-functional team to develop an AI-based facial analysis application
- Contributed to the development of deep learning models for image classification and detection
- Worked closely with mobile and cloud teams to integrate the model into the application
- Demonstrated strong teamwork, communication, and problem-solving skills throughout the project

EDUCATION

University Of Technology Yogyakarta

Yogyakarta, Indonesia

Bachelor of Informatics (S.Kom.) - GPA:3.70/4.00

2022-2026

Relevant Coursework: Software Engineering, Artificial Intelligence, Algorithm

Undergraduate Thesis: Optimization of Convolutional Neural Network Architecture using Squeeze-and-Excitation Attention for Herbal Leaf Classification
